SUMMARY OF QUALIFICATIONS

Versatile and highly motivated software engineer with foundations in sortation systems and recent experience in game development education. Skilled in the full project development lifecycle, including design, implementation, and testing of high-performance software solutions. Recently education includes experience in the Unreal Engine 4/5 and Godot game engines. Seeking a programming position to utilize and leverage the skills learned through software engineering and education in game development.

Game Engines	Game Development	Software Engineering	Soft Skills
• Unreal Engine 4/5 • UE C++ Programming • UE Blueprint Scripting • UE Networking • UE UMG UI • GDScript (Godot programming language)	• Gameplay engineering • Networking and multiplayer • Asset integration • UI/UX	• SQL databases • Testing & quality assurance • Agile/Scrum • Project documentation • Version control • TCP/UDP Protocols	• Team collaboration • Clear communication • Problem solving • Project ownership and management

WORK EXPERIENCE

BEUMER Group | ***Software System Engineer II*** Sept. 2020 – June 2024

- Primary software engineer for multiple automation systems, including the designing and implementations of backend solutions using scrum methodology.
- Collaborative with the internal software group and international software teams to produce efficient software, share knowledge, and optimize workflows.
- Developed thorough testing simulation systems to validate software logic before testing with machine control systems and customer systems.
- Consistent coordination with customer engineers to guarantee the development and release of sortation software that meets customer specifications.
- Frequent post-project customer support involving software updates, validation tests, and documentation updates.

EDUCATION

Full Sail University | *MS in Game Design* Nov. 2025 – Current
CG Spectrum | *Game Programming with Unreal Engine* Jan. 2023 – Oct. 2023
Rowan University | *BS in Computer Science* Sept. 2016 – Dec. 2019

TECHNICAL PROFICIENCY

Programming Languages: **C#, C++, Python, SQL, NoSQL**
Game Development Engines: **Unreal Engine 4/5, Godot, GameMaker Studio 2, Unity**
Version Control: **TortoiseSVN, GitLab, GitHub**
Task Management: **Jira, ClickUp, Microsoft Project**
Other Tools: **Visio, Word, Excel, PowerPoint, Photoshop, Blender, Tableau**
